**Period for Reply**

**A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.**

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 6-8, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Drewery et al. (4,897,716).

Regarding claim 1, Drewery shows a television receiver for receiving a television signal and a movement information signal, which meets the receiving step as claimed, and cross fade controls 118 and 120, which meet the processing step as claimed. It should be noted that the movement information signal is essentially a video resolution control factor. It is inversely proportional to the video quality. A motion image in a video causes the image resolution to decrease, and vice versa. Therefore, the movement information signal reads on the quality indication signal as claimed.

Regarding claim 2, the cross-faders 110 and 112 meet the picture enhancement operation as claimed.

Regarding claim 3, the cross-faders 110 and 112 improve both the sharpness and contrast of the picture signal since they provide an interpolated video signal an original video signal based on the received motion indication signal.

Regarding claim 4, the cross-faders and the cross-fader controls are intended to reduce noise and artifacts.

Regarding claims 6-8, and 10, see the corresponding rejections as applied for method claims above.

***Allowable Subject Matter***

3. Claims 12 and 13 are allowed.
4. Claims 5, 9 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Lee whose telephone number is 703-305-4743. The examiner can normally be reached on Monday through Thursday from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Miller, can be reached on 703-305-4795. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
